

DUX BEDS

CRAFTED SLEEP

A GOOD NIGHT'S SLEEP IS CRAFTED

A DUX bed contains thousands of interconnected springs that actively support your movements during the night and help you turn around gently without disturbing your sleep. Several of our models are also available with the DUX Pascal® system which enables you to adjust the support individually in three comfort zones on each side of the bed – as often as you like and whenever you want. Our beds are crafted with the best natural materials such as slow growing pine, Swedish steel and natural latex. Almost all parts of a DUX bed can be replaced if they wear out or your body, or even situation, changes – so that your bed lasts longer.

DUX

1001

DUX 1001 with its double layer of springs is the perfect introduction to the legendary comfort of DUX. The design is based on the first DUX bed made back in 1926, which has been further developed over the years. A combination of our proud heritage and modern day bed comfort.

DUX

2002

DUX 2002, with its unique removable top, is the first product in a raft of innovations from DUX. DUX 2002 is a double-spring bed with 9 cm and 12 cm high springs, and a unique top that can be unzipped and removed and which is filled with soft stitched natural latex for unbeatable comfort. The bed is available in a medium or firm versions and has a mattress height of 26 cm.

DUX

3003

DUX 3003 is our most popular bed. The high level of comfort is based on the interaction between two DUX innovations: the spring system with thousands of interlinked springs, and the unique Pascal system with its movable springs that allows the bed to be easily adapted to individual needs.

DUX

6006

DUX 6006 features two DUX innovations that together offer optimal comfort. The bed has exceptionally deep springs thanks to DUX's double-spring system, with thousands of dynamically interlinked springs. Depending on the size, the bed features up to six Pascal cartridges divided according to the body's three comfort zones—shoulders, hips, and legs. Each zone can be adjusted to be soft, medium, firm, or extra firm, allowing the bed to be adjusted to individual needs.

DUX
8008

DUX 8008 continental bed is our most advanced and exclusive bed. It has twice as many springs as a regular bed, and more customisation options than any other. DUX's double-spring system, with thousands of dynamically interlinked springs, offers exceptional spring depth. Depending on the size, the bed features up to six Pascal cartridges divided according to the body's three comfort zones – shoulders, hips, and legs. Each zone can be adjusted to be soft, medium, firm, or extra firm. DUX 8008 also features an adjustable lumbar support system for each side of the bed. With the twist of a dial, you can visibly set the level between medium and firm.

LEGS

Round Ø 5,5 cm
Height 12, 16, 20, 23 and 30 cm
Available in white, beech, mahogany, black, oak and walnut

With or without castors
Height 8, 16 and 23 cm

Fitting for hidden legs
Joins two mattresses together but keeps the center support out of sight

DUX DYNAMIC

DUX Dynamic combines the best that a traditional DUX bed has to offer, with the added advantage of adjustability. Choose the position yourself with a simple press of a button on the handheld controller. DUX Dynamic is operated by a reliable low-voltage motor. Three layers of springs guarantee a great night's sleep. The top layer is based on our Pascal system that moulds to your three body zones: Shoulders, hips, and legs.

DUX AXION

DUX Axion has all the characteristics of a classic DUX bed and is also height adjustable. The DUX double-sprung system with multiple layers of thousands of interlinked springs offers the perfect combination of stability and support. The position can easily be changed with the touch of a button on the handheld controller. Smart and simple technology to make your nights (and days) even more comfortable.

TOP PADS

DUX SUPPORT

Deeply tufted mattress with a core of latex and an outer layer of polyether fiber wadding for extra ventilation and softness.
Thickness: 6 cm.

DUX SUPPORT PLUS

Deeply tufted mattress pad with a core of natural latex. Outer layer of cotton wadding for extra ventilation and softness.
Thickness: 7.5 cm.

DUX SUPPORT WITH BUTTONS

Mattress pad with a core of natural latex. Outer layer of cotton wadding for extra ventilation and softness. Leather-covered buttons and leather piping. Available only with our DUX 8008 model.
Thickness: 6 cm.

DUX SUPPORT XOFT

Our softest top pad with a 4-way stretch fabric. It is a deeply tufted mattress pad with a natural latex core and an outer layer of cotton wadding for extra ventilation and softness.
Thickness: 6 cm.

DUX PASCAL DE LUXE

Unique mattress pad incorporating the DUX-patented Pascal system. Each comfort zone can be individually adapted to soft, medium, firm or extra firm. This allows the mattress to be adjusted to accommodate individual needs, in the event of pregnancy, back pain and so on.
Thickness: 10 cm.

DUX CONTINENTAL

Single-spring mattress in two different thicknesses, 15 or 18 cm, featuring DUX' unique spiral system. The 15 cm mattress has a natural latex layer on one side while the 18 cm version has latex on both sides, making it reversible. Also suitable as a spare mattress.
Thickness: 15 or 18 cm.
